## **PROFILE OF MAJOR AREAS OF RESPONSIBILITY AND RELATED TASKS**

MARCH 2002 (REVIEWED BY PARTICIPANTS)

Facilitated by:  
Wilson Associates - Education Consultants Inc.

© The PALLIUM Project, 2002

## The PALLIUM Project

PALLIUM is a health human resource project focused on significantly improving access to system-linked education and professional development in palliative and end-of-life care for Canadian health care professionals and citizen-consumers, particularly in Alberta, Saskatchewan, Manitoba and North West Territories. The PALLIUM Project has received catalytic funding by Health Canada, under Budget '99 provisions creating the Rural and Remote Health Innovations Initiative (RRHII).

### Major Funder (2001-2002)

Health Canada,  
Rural and Remote Health Innovation Initiative

### Project Hosting Authority

Alberta Cancer Board, Research Administration

### Founding Academic Partners

University of Alberta

- Division of Palliative Medicine, Department of Oncology
- Academic Technologies for Learning, Faculty of Extension
- Institute for Professional Development, Faculty of Extension
- Division of Continuing Medical Education
- Division of Outreach Pharmacy Education, Faculty of Pharmacy and Pharmaceutical Sciences

University of Calgary

- Division of Palliative Medicine, Department of Oncology
- Office of Continuing Medical Education and Professional Development

University of Manitoba

- Section of Palliative Care, Department of Family Medicine

University of Saskatchewan

- Palliative Medicine Program, Department of Family Medicine and Department of Oncology

### Founding Health Service Partners

Alberta Cancer Board, Research Administration  
Calgary Regional Health Authority (CRHA)  
Capital Health Authority, Edmonton  
Caritas Health Group, Edmonton  
Chinook Health Authority (Alberta)  
East Central Health (Alberta)  
Inuvik Regional Health and Social Service Board  
Lakeland Regional Health Authority (Alberta)  
Regina Health District  
Saskatoon Health District  
Stanton Regional Health Board, Yellowknife  
Winnipeg Regional Health Authority

### Other Founding Partners

Rural Physician Action Plan (RPAP), Alberta  
Alberta Palliative Care Association

Appreciation is extended to the following Palliative Care professionals for developing this profile:

---

<b><i>Dorothy Quirk</i></b>	Social Worker; Palliative Care Coordinator	Moose Jaw, Saskatchewan
<b><i>Edna Parrot</i></b>	Palliative Care Coordinator; President Saskatchewan Palliative Care Association	Kamsack, Saskatchewan
<b><i>Cheryl Smith</i></b>	Palliative Care Coordinator; Northeastman Health Association	Pinawa, Manitoba
<b><i>Merle Teetaert</i></b>	Palliative Care Coordinator; Southwestman Regional Health Authority	Deloraine, Manitoba
<b><i>Margaret Clarke</i></b>	Executive Director; Hospice & Palliative Care Manitoba	Winnipeg, Manitoba
<b><i>Chantal Vallee</i></b>	Palliative Care Coordinator; Lakeland Regional Health Authority	Bonnyville, Alberta
<b><i>Cornelius Woelk</i></b>	Family Physician; Medical Director of Palliative Care; Central Region Health Authority, Manitoba	Winkler, Manitoba
<b><i>Ken Stakiw</i></b>	Family Physician; Palliative Care Physician	Saskatoon, Saskatchewan
<b><i>Marilynn Gray</i></b>	Home Care Manager; Palliative Care Coordinator NEHD	Nipawin, Saskatchewan
<b><i>Darby Johanson</i></b>	Regional Palliative Care Coordinator; Norman RHA	The Pas, Manitoba
<b><i>Eileen Peter</i></b>	Family Physician; Member - Palliative Care Committee; Stanton Regional Hospital	Yellowknife, Northwest Territories
<b><i>Elizabeth Hill</i></b>	Palliative Care Coordinator; Chemotherapy Nurse	Meadow Lake, Saskatchewan

Jose Pereira, MBChB, DA, CCFP, PALLIUM Project Leader

Michael Aherne, PALLIUM Project Consultant

Hubert Marr, Physician; Palliative Care Program, Calgary Regional Health Authority (Observer)

Wilson Associates - Education Consultants Inc.

January, 2002

## PROFILE OF MAJOR AREAS OF RESPONSIBILITY AND RELATED TASKS

---

### **A Note on the Application of Occupational Analysis Methods to Health Professions' Education and Professional Development**

The DACUM approach to educational program development has become widely known in Canada and the United States over the last 30 years as an effective means to involve front-line staff and leaders in the design of learning. It is based on the assumption that the people who actually perform a role or oversee it being done are the people who can best describe the role functions. The purpose of this modified DACUM workshop was to identify Major Areas of Responsibility and Major Tasks for health care professionals providing primary-level palliative and end-of-life care.

The DACUM approach is a systematic, analytic and descriptive process of gathering, documenting and analyzing information about actions that people in a particular role or job take in performing the tasks incumbent in that role. In this sense it is both explanatory and predictive as a needs assessment protocol. It also has the potential to lend itself well to the goal of designing education and professional development that is clearly linked to better patient care and quality and compassionate care outcomes.

This profile chart lists the *major areas of responsibility* and related *tasks* performed in this occupation.

The *major areas of responsibility* are listed vertically along the left-hand margin, in bolded boxes. These bolded boxes contain the title and alphabetical designation for each major area of responsibility (such as A, B, C, etc.).

The *tasks* that are performed within each major area of responsibility are listed in boxes and placed in horizontal bands beside the relevant major area of responsibility. Each task box contains the task description and an alphabetical and numerical designation (such as A1, A2, A3, etc.).

Professionals in this field provided the information in this profile chart. This analysis is a living document, which should be revisited, refined, and updated in future years.

---

## DEFINITION

---

Primary palliative care professionals  
provide direct and ongoing supportive end-of-life care,  
for an individual and family by addressing  
physical, emotional, social, cultural and spiritual needs  
with dignity and compassion.

---

<p><b>ESTABLISH THE PALLIATIVE INDIVIDUAL CASE</b></p> <p style="text-align: right;"><b>A</b></p>	<p>Complete a thorough multi dimensional assessment - physical - psycho-social - spiritual</p> <p style="text-align: right;">A1</p>	<p>Determine patient's understanding of condition and expectations</p> <p style="text-align: right;">A2</p>	<p>Maintain connection with patient</p> <p style="text-align: right;">A3</p>	<p>Identify all possible sources of suffering e.g. physical, psycho-social, spiritual</p> <p style="text-align: right;">A4</p>	<p>Consider co-morbidity</p> <p style="text-align: right;">A5</p>
	<p>Facilitate the transition from curative to palliative care</p> <p style="text-align: right;">A6</p>	<p>Marshall appropriate resources in allied agencies to support individual/family in support activities</p> <p style="text-align: right;">A7</p>	<p>Identify and access other agencies who have been involved with individual</p> <p style="text-align: right;">A8</p>	<p>Establish and maintain a dynamic care plan</p> <p style="text-align: right;">A9</p>	
<p><b>MANAGE PAIN</b></p> <p style="text-align: right;"><b>B</b></p>	<p>Assess pain e.g. - verbal - non verbal - history</p> <p style="text-align: right;">B1</p>	<p>Select and utilize appropriate pain assessment tools</p> <p style="text-align: right;">B2</p>	<p>Debunk myths related to addiction, tolerance and dependence</p> <p style="text-align: right;">B3</p>	<p>Apply comfort measures</p> <p style="text-align: right;">B4</p>	<p>Identify compatibility of medication</p> <p style="text-align: right;">B5</p>
	<p>Switch between opioids</p> <p style="text-align: right;">B6</p>	<p>Monitor pain control and adjust as required</p> <p style="text-align: right;">B7</p>	<p>Educate individuals and family on pain management</p> <p style="text-align: right;">B8</p>	<p>Follow up on medication changes</p> <p style="text-align: right;">B9</p>	
<p><b>MANAGE SYMPTOMS</b></p> <p style="text-align: right;"><b>C</b></p>	<p>Recognize and treat common symptoms (see Appendix A)</p> <p style="text-align: right;">C1</p>	<p>Recognize and manage palliative care emergencies (see Appendix B)</p> <p style="text-align: right;">C2</p>	<p>Select and utilize appropriate symptom assessment tools</p> <p style="text-align: right;">C3</p>	<p>Manage side-effects of treatment regimes</p> <p style="text-align: right;">C4</p>	<p>Share expertise with other health care professionals regarding symptoms and pain management techniques</p> <p style="text-align: right;">C5</p>
	<p>Educate individual and family on symptom management and progress of disease</p> <p style="text-align: right;">C6</p>				

**COMMUNICATE IN A SENSITIVE AND RESPECTFUL MANNER**  
D

Encourage family and individual to address legal/financial issues  
D1

Solicit individual and family collaboration  
D2

Advocate for individual and family  
D3

Listen actively!  
e.g. individual, family team, other resources  
D4

Recognize manifestation of and obviate iatrogenic suffering  
D5

Utilize a variety of communication modalities e.g. written, oral, video, pamphlet and interpreters  
D6

Confirm patient's understanding of diagnoses, situation and choices  
D7

Educate patient and family on self advocacy when working with many health care professionals  
D8

Prepare individual and family on what to expect with various treatment regimes  
D9

Create a safe and secure communication environment  
D10

Recognize individual right to choose and refuse treatment  
D11

Collaborate with other professionals and agencies  
D12

**ADDRESS GRIEF AND BEREAVEMENT ISSUES**  
E

Reframe hope and healing  
E1

Recognize anticipatory grief when individual is living  
E2

Educate individual and family on loss and grief  
E3

Support bereavement education as part of health promotion and well being  
E4

Recognize when "normal" grief becomes "complicated" grief  
E5

Respond to the special needs of young children and adolescents  
E6

Recognize and help caregivers to deal with their grief  
E7

Recognize community's grief  
E8

Consider fulfilling other multiple caregiver roles as required by community  
E9

<p><b>DEAL WITH ETHICAL/LEGAL REALITIES</b></p> <p><b>F</b></p>	<p>Address abusive relationships</p> <p>F1</p>	<p>Consider implications of prescribing opioids to individuals in high risk environments</p> <p>F2</p>	<p>Discuss advanced health directives</p> <p>F3</p>	<p>Address family dynamics issues</p> <p>F4</p>	<p>Address clinical/ethical issues e.g. - Tube feeding - Diagnostics - Nutrition hydration - Antibiotics</p> <p>F5</p>
	<p>Address health professional disagreements</p> <p>F6</p>	<p>Make decisions regarding the operation of a motor vehicle</p> <p>F7</p>	<p>Address workplace safety issues</p> <p>F8</p>	<p>Obtain family consent when necessary</p> <p>F9</p>	
<p><b>RECOGNIZE THE REALITIES OF PRIMARY PALLIATIVE CARE</b></p> <p><b>G</b></p>	<p>Recognize own limitations</p> <p>G1</p>	<p>Deal with treatment of a friend e.g. rural setting</p> <p>G2</p>	<p>Manage time</p> <p>G3</p>	<p>Seek to improve the integration and coordination of information</p> <p>G4</p>	<p>Recognize the implications of population, demographics, isolation, geography</p> <p>G5</p>
	<p>Cope with transient health care providers</p> <p>G6</p>	<p>Cope with limited resources</p> <p>G7</p>	<p>Acknowledge and respond to other health professional attitudinal barriers</p> <p>G8</p>		
<p><b>ADVANCE PALLIATIVE CARE PROFESSION AND INFRASTRUCTURE</b></p> <p><b>H</b></p>	<p>Serve as a role model</p> <p>H1</p>	<p>Build teams</p> <p>H2</p>	<p>Develop self care strategies</p> <p>H3</p>	<p>Reflect on own attitude and practices</p> <p>H4</p>	<p>Seek to improve one's own skills and knowledge</p> <p>H5</p>
	<p>Examine accountability parameters e.g. physician role, nurses role</p> <p>H6</p>	<p>Support inclusion of palliative care education in undergraduate and residency programs</p> <p>H7</p>	<p>Use and interpret research results</p> <p>H8</p>		

## RECOGNIZE AND TREAT COMMON SYMPTOMS

- ❑ Nausea/Vomiting
- ❑ Bowel Obstruction
- ❑ Dyspnea
- ❑ Secretions
- ❑ Delirium/Terminal Delirium
- ❑ Myoclonus
- ❑ Anorexia/Cachexia/Asthenia
- ❑ Anxiety/Depression
- ❑ Mouth Care Issues
- ❑ Constipation
- ❑ Edema/Ascites
- ❑ Dehydration
- ❑ Wounds

## RECOGNIZE AND MANAGE PALLIATIVE CARE EMERGENCIES

- ❑ Spinal cord compression
- ❑ Superior vena cava compression
- ❑ Hypercalcemia
- ❑ Crisis shortness of breath/pain (sedation)
- ❑ Seizures
- ❑ Crisis hemorrhage/bleed

**AREA OR QUESTIONS REQUIRING FURTHER CONSIDERATION**

- ❑ Improved health information systems and sharing of health information to assure seamless care
- ❑ Focused, collaborative steps among primary, secondary and tertiary levels to advance patient-centred care
- ❑ A recognition that family physicians need to allocate and protect time to address palliative care properly (may involve remuneration issues around cost of proper provision of palliative care service)
- ❑ Concerns about the mobility and transition of health care professional people and skills in rural and remote areas (e.g., high turnover)
- ❑ Health system organization affects the way we organize care and is often a barrier to continuum of care
- ❑ How do you get health care professionals to recognize what they do not know (i.e., lack of awareness about what constitutes properly designed and delivered palliative care)
- ❑ Providing “ongoing supportive” care may conflict with the episodic nature of current physician and care payment schedules
- ❑ Efficient and effective rural end-of-life care may include acknowledging disparity of diagnostic and specialty resources available in rural and remote areas (e.g., CT scanners, MRI, epidural)
- ❑ Recognition that a physician may not always be there – so, nurturing a work environment of shared accountability with nurses is essential, as well as nurses and other allied health professionals accepting greater ownership for being accountable in the overall care and active management of the palliative care patient
- ❑ A phenomena of “physician (or other care provider) as neighbour” in rural and remote contexts, may result in potential role conflict
- ❑ There needs to be fair physician and system compensation that accurately reflects the service and time requirements of providing proper palliative care
- ❑ Competency through volume of patients (i.e., construct of practice makes perfect) is a significant challenge in rural and remote contexts, so reference and supportive resources need to be in place to support the palliative professional

## PRIMARY PALLIATIVE CARE PROFESSIONAL

### CHARACTERISTICS

- ❑ Blend of skill and kindness
- ❑ Display non-judgmental attitude
- ❑ Ability to impart knowledge through communication and training
- ❑ Humor

## PRIMARY PALLIATIVE CARE PROFESSIONAL

### KNOWLEDGE

- ❑ Basic Oncology
  - palliative radiation
  - palliative chemotherapy
- ❑ Assessment tools (pain and symptom)
- ❑ Medications
  - ways to administer medications
  - WHO analgesic ladder
  - Understanding opioids
  - Adjuvant/alternative therapies
  - Compatabilities
- ❑ Common symptoms
  - side effects
  - types
- ❑ Palliative care emergencies
- ❑ Local resources and system capability
- ❑ Types of pain (comfort measures)
- ❑ Health care directives legislation in the jurisdiction of practice
- ❑ Occupational health and safety legislation and regulations (e.g., staff safety)
- ❑ Theory of anticipatory grief and normal grief

## PRIMARY PALLIATIVE CARE PROFESSIONAL

### SKILLS

(some skills will be discipline specific)

- ❑ Maintain central I.V. lines
- ❑ Initiate/maintain hypodermoclysis
- ❑ Thoracentesis
- ❑ Paracentesis
- ❑ Manage infusion pumps (including programming)

## PRIMARY PALLIATIVE CARE PROFESSIONAL

### COMMENTS FROM THE PARTICIPANT REVIEW AND VALIDATION PROCESS (February 2002)

#### Introduction

All participants who were involved in identifying the Major Areas of Responsibility, the Major Tasks, and the Knowledge, Skills, and Characteristics for a Primary Palliative Care Professional were also asked to review and comment on the output. All participants (see page 03) were invited to respond to these three questions:

- 1) Are the findings presented in the attached document consistent with your personal and professional insights as shared during the DACUM process? \_\_\_\_\_ Consistent \_\_\_\_\_ Not consistent
- 2) If you answered “not consistent,” what clarifying/explanatory notes would you add that might contribute to a final refinement of this document (please be concise and make reference to the question/questions/points you are addressing)?
- 3) Do you have any other suggestions or insights that you would like to share since you participated in the initial interview?

#### Results

The results were reported by respondents as consistent with what they developed during the modified DACUM workshop process. There was one respondent who reported “sort of consistent”. In elaborating on this response, the participant noted the following:

“Palliative care also deals with end stages of illness (e.g., liver disease), congested heart failures, renal failures. Under the KNOWLEDGE section an individual [primary palliative care professional] needs to know the anatomy and physiology of the body and the disease process with which they are dealing. How can you help someone not knowing about the illness and what it is/will be doing to this person’s body, mind, etc. I feel that anatomy and physiology of the body and disease processes be added to KNOWLEDGE.”

#### Future Development of this Document

This DACUM report is intended as a “living document,” representing a snap shot in time of a representative group of primary health care professionals from primary care and rural practices with a significant palliative care component. Comments and suggestions about the Major Areas of Responsibilities, Major Tasks, and Knowledge, Skills, and Characteristics of primary palliative care professionals can be sent by email to: Michael Aherne, PALLIUM Project Consultant, at [maherne@ualberta.ca](mailto:maherne@ualberta.ca) and/or Jose Pereira, PALLIUM Project Leader, at [pereiraj@ucalgary.ca](mailto:pereiraj@ucalgary.ca).
