<p>Anne 11:27 AM</p> <p><b>I am wondering if it is helpful or harmful when we do intake questions for clients to ask about previous trauma? This could be triggering for clients and not sure if always as a practitioner I am trained to help unpack everything. Especially sometimes we have screening questions that ask very specific questions of any abuse experiences to see if clients are at 'higher' risk of addictions, however I often feel these questions could be triggering.</b></p>	<p>This question was answered in the webinar.
