

Webinar Q&A
Shortage of Palliative Care Medications during COVID-19 – Part 2 – Wednesday
July 29 @ 4 pm ET

Question	CPC Exchange	
<p>Anonymous 04:55 PM</p> <p>How would you see a national pharma program would benefit or impact drug shortages?</p>	<p>There were several questions submitted during the webinar that the panellists were unable to answer due to the time restrictions of the webinar.</p> <p>Please continue the discussion by joining the Canadian Palliative Care Exchange and posting your question as a discussion topic.</p> <p>There is no cost to participate.</p> <p>Join now to share and learn alongside your colleagues from across Canada: www.cpcexchange.ca</p>	
Question	Answer	CPC Exchange
<p>Muriel 04:04 PM</p> <p>What is cccp?</p>	<p>Do you mean CSPCP? Canadian Society of Palliative care Physicians.</p>	<p>If you'd like to continue this conversation head to the Canadian Palliative Care Exchange and create a discussion topic or contribute to a conversation already taking place.</p>
<p>Audrey 04:21 PM</p> <p>Who has access to these symptom response kits? Do nurses going into the home have access to these, or only doctors?</p>	<p>This question was answered in the webinar. Go to 26:48 in the recording.</p>	<p>There is no cost to participate.</p> <p>Join now to share and learn alongside your colleagues from across Canada: www.cpcexchange.ca</p>

<p>Anonymous 04:23 PM</p> <p>Could you provide kits where the compartments are zip tied, so that the compartments which are still zip tied could be reused? (This would be similar to how crash carts are stocked in a hospital).</p>	<p>This question was answered in the webinar. Go to 28:02 in the recording</p>	
<p>Claire 04:26 PM</p> <p>May want to also look at community MAiD kits....</p>	<p>Dr. Charlie Chen</p> <p>From Dr. Sauls: I would think that MAiD kits are only dispensed with the actual drugs that will be used at the time they will be used. I wouldn't anticipate much wastage. I would have to add that I don't have specific experience with this.</p>	
<p>Claire 04:48 PM</p> <p>Even the SRKs that aren't opened are being discarded unfortunately at this time.</p>	<p>This question was answered in the webinar. Go to 48:15 in the recording</p>	
<p>Dr. Paul-André 04:29 PM</p> <p>How successful has been the collaboration between health care professionals?</p>	<p>Sometimes it can feel like we are really isolated when we are working in our mini silos within larger silos but I have been really impressed with how eager both individuals and institutions have been to try to collaborate on initiatives</p>	
<p>Cynthia 04:30 PM</p>	<p>Dr. Bob Sauls</p>	

<p>Dr. Sauls- are the symptom response kits available for nurses to use in the Northern Remote communities of Ontario and are there Physicians utilizing this strategy?</p>	<p>There are kit order forms available for all of the 14 LHIN regions of the province however, the access to these in some communities will vary. There can be a variety of reasons for this variability - again, the local nature of drug delivery mechanisms.</p>
