

Pallium Palliative Pocketbook (3rd Edition)

Table of Contents

Introduction

Abbreviations

Chapter 1: Principles of Palliative Care

- Defining palliative care
- Who requires palliative care?
- Who provides palliative care?
- Where is palliative care provided?
- Defining “hospice palliative care”
- The benefits of palliative care

Chapter 2: Illness Trajectories

- What are illness trajectories and why do they matter?
- Individualized care
- Illness trajectory by disease type
- Illness trajectory diagrams

Chapter 3: Identifying Patients

- Why is timely identification important?
- Guiding principles
- Strategies and tools
- The Surprise Question (SQ)
- General identification tools
- Data and electronic health record (EHR)-driven triggers
- Disease-specific markers to identify patients with palliative care needs
- Strategies for daily practice
- Identifying patients requiring referral to a specialist-level palliative care clinician or service
- Complexity

Chapter 4: Assessment and Needs

- Palliative care needs of people with serious illnesses
- Screening and assessing symptoms and needs
- PROM instruments for daily practice 4-5
- Good practices using the ESAS-r and PROMs
- Assessing function
- What patients with serious illnesses and at the end of life experience and want

Chapter 5: Prognostication

- Importance of predicting survival (life expectancy)
- Principles of survival prediction
- General clinical indicators (seen across diagnoses) of EOL approaching

- Laboratory/physiological markers (non-diagnosis-specific) of EOL approaching
- Validated composite scores that help indicate EOL approaching
- Disease-specific add-ons (use with the general list) indicating that EOL is approaching
- Communicating prognosis with patients and family

Chapter 6: Advance Care Planning (ACP) and Goals of Care (GoC)

- Advance care planning (ACP)
- Why ACP matters
- When should ACP be done?
- Common misunderstandings
- ACP: cultural and ethical considerations
- Goals of care (GoC)
- ACP versus GoC
- Consent
- Steps to initiate and support ACP discussions
- Points to consider when discussing ACP
- Practical tips for clinicians
- Advice for patients
- Resources

Chapter 7: Decision Making and Ethics in Palliative Care

- Factors to consider
- What to avoid
- Consent
- Capacity
- If the person is incapable
- Ethics in end-of-life (EOL) care
- Ethical decision-making frameworks
- Medical assistance in dying (MAiD) (euthanasia and assisted suicide)

Chapter 8: Communication

- Basic principles of communication in palliative care
- Serious illness conversation (SIC) structure
- Breaking bad news
- Disclosure: telling patients the truth
- Responding to “Don’t tell her [patient] that she is dying!”
- Initiating palliative and end-of-life (EOL) care discussions
- Advance care planning and goals of care
- Discussing goals of care or treatment changes or transitions
- Establishing goals of care
- Eliciting concerns
- Expressing empathy and responding to emotions and compassion
- Avoid blocking behaviours
- Using touch
- Reframing hope
- Responding to ambivalence

- Discussing code status
- Dealing with denial
- Responding to “How long do I have to live?”
- The family conference
- The difficult family conference or where there is no consensus or the expectations are unrealistic
- Promoting dignity (dignity-conserving care)

Chapter 9: Pain

- Prevalence
- Causes
- Barriers to effective pain control
- Classification of pain
- Assessment of pain
- Management of pain
- Selecting an analgesic regimen
- The WHO Ladder
- Initiating a strong opioid
- Management of Pain Types: An Overview
- Visceral pain
- Pain crisis
- Appendix 1: Additional information on non-opioid analgesics
- Appendix 2: Additional information on opioid analgesics
- Appendix 3: Opioid formulations available in Canada
- Appendix 4: Starting doses, duration of action, intervals

Chapter 10: Respiratory Symptoms

- Breathlessness (dyspnea)
- Causes of dyspnea
- Assessment
- Management of breathlessness in cancer patients
- Hemoptysis
- Pleural effusions
- Tracheobronchial obstruction
- Pericardial effusion and tamponade
- Superior Vena Cava Syndrome (SVCS)
- Cough
- Bronchorrhea
- Upper airway secretions at end of life
- Hiccups
- Pulmonary embolism (PE)
- Investigations

Chapter 11: Delirium

- General
- Causes: predisposing factors and precipitants
- Clinical presentation
- Screening
- Assessment
- Management
- Addressing underlying causes
- Non-pharmacological measures
- Pharmacological management

Chapter 12: Hydration and Nutrition

- Hydration: background
- Artificial hydration (AH)
- Anorexia
- Cachexia syndrome (muscle wasting and weight loss)
- Artificial nutrition (AN) and its role in palliative care

Chapter 13: Gastrointestinal Problems

- Nausea and vomiting
- Constipation
- Diarrhea
- Malignant bowel obstruction
- Anorexia (appetite loss), cachexia (muscle and weight loss), and nutrition
- Thirst in the palliative care context
- Ascites
- Dyspepsia
- Dysphagia
- Gastrointestinal (GI) bleeding
- Stomas
- Fistulas
- Hepatic failure
- Tenesmus and tenesmus pain
- Xerostomia (dry mouth)
- Oral and esophageal candidiasis
- Stomatitis
- Drooling (sialorrhea)

Chapter 14: Other Complications

- Fatigue (asthenia)
- Edema
- Metabolic, Electrolyte, and Endocrine
- Hematological Problems
- Cardiac Complications
- Skin and Wounds
- Fever and Sweats

Chapter 15: Neurological Complications

- Common neurological complications in advanced disease
- Cerebral metastases
- Seizures
- Status epilepticus
- Spinal cord compression

Chapter 16: Psychological Care

- General
- Adjustment disorder
- Major anxiety disorders
- Pharmacological management
- Major depressive disorder
- Demoralization syndrome
- Insomnia

Chapter 17: Grief and Bereavement

- Definitions
- Types of grief
- Diagnosing grief: criteria and considerations
- Differentiating normal versus abnormal grief
- Caring for persons with normal grief
- Caring for persons with abnormal/complicated grief
- Key takeaways for palliative care

Chapter 18: Spiritual Care, Suffering, Hope, Compassion, and Dignity

- Spiritual care
- Spiritual needs of terminally ill patients
- Religion
- Existential needs
- Spiritual pain (existential distress)
- Clinical presentation of “spiritual” or “soul” pain
- Self-awareness
- Dignity
- “Am I being treated with dignity and respect?” from the perspective of a patient
- Fractured personhood (Chochinov)
- Hope in the context of advanced disease
- Empathy and compassion in the context of advanced disease
- Suffering in the context of palliative care
- Approaches to end of life (EOL) across major faith traditions, beliefs, and customs: consideration

Chapter 19: Social Care in Palliative Care

- Practical and daily living support
- Access to home and community services
- Financial and benefits support

- Housing and residential care
- Caregiver and family support
- Social and emotional support
- Legal and advance care planning support
- Care transitions
- Cultural, linguistic, and equity considerations
- Social isolation and vulnerability
- Screening for and identifying social needs
- The clinician's role in social care
- Cultural sensitivity in social and palliative care

Chapter 20: Palliative Care in Advanced Heart Diseases

- Advanced heart diseases that commonly need palliative care
- Palliative care needs of patients with advanced heart diseases
- Identifying patients requiring palliative care (primary/generalist-level or specialist-level)
- Screening and assessment of symptoms and needs
- Advanced heart failure (HF)
- Advanced HF: indicators
- Pacemakers, ICDs, and related cardiac devices
- Mechanical circulatory support, including LVADs
- Other heart conditions

Chapter 21: Palliative Care for Patients with Advanced Lung Disease

- Advanced lung diseases that commonly need palliative care
- Palliative care needs of patients with advanced lung diseases
- Identifying patients requiring palliative care (primary/generalist-level or specialist-level)
- The palliative care approach in advanced lung diseases
- Screening and assessment of needs
- Chronic obstructive pulmonary disease (COPD)
- Idiopathic pulmonary fibrosis (IPF)
- Oxygen therapy
- Special considerations for palliative care
- Appendix 1: Primers

Chapter 22: Palliative Care in Advanced Kidney Disease (CKD)

- Kidney supportive care
- Palliative care needs of patients with advanced CKD and ESKD
- Identifying patients requiring a palliative approach to care (primary/generalist- or specialist-level) integrated into care
- Transition points in advanced CKD and ESKD
- Identify symptoms and needs in patients with advanced CKD
- Conservative kidney management (CKM)
- Medication management and deprescribing in CKD
- Rehabilitation and exercise in patients with CKD
- Symptoms and needs of patients with CKD
- EOL care in CKD (last days and hours)

Chapter 23: Palliative Care for Patients with Advanced Liver Diseases

- Advanced liver diseases that benefit from palliative care
- Illness trajectories of patients with advanced liver diseases
- The importance of palliative care in patients with advanced liver disease
- Indicators that should prompt integrating a palliative approach to care
- Prognosis and staging
- Palliative care needs and approach in liver disease
- Pharmacotherapy considerations in advanced liver disease
- Common symptoms and complications
- Procedures and ICU decisions
- Resources

Chapter 24: Palliative Care in Advanced Neurological Diseases

- Advanced neurological diseases that commonly need palliative care
- Motor neuron disease (MND) (including amyotrophic lateral sclerosis [ALS])
- Multiple sclerosis (MS)
- Parkinson's disease (PD)

Chapter 25: Palliative Care in Dementia

- Types of dementias
- Phases of dementia
- Palliative care needs of people with dementia and families
- Indicators of advanced dementia
- Indicators for initiating palliative care
- Screening and assessment
- Management: general
- Management: needs of family and caregivers
- Management: specific symptoms and complications
- Special considerations

Chapter 26: Pediatric Palliative Care

- Introduction
- Benefits of pediatric palliative care
- Unique aspects of pediatric palliative care
- Illnesses and populations of children requiring palliative care
- How many children need palliative care?
- Where is pediatric palliative care provided?
- Who provides palliative care to children?
- Caring for children with palliative care needs
- Advance care planning and goals of care discussions
- Transitions to adult services

Chapter 27: Palliative Care Emergencies

- Examples of emergencies in palliative care
- Management principles in general
- Spinal cord compression (SCC)
- Massive bleeding
- Seizure
- Status epilepticus
- Superior Vena Cava Syndrome (SVCS)

Chapter 28: Last Days and Hours

- Signs that EOL phase (last weeks and days) is approaching
- Preparing for the EOL phase
- When death is imminent
- Upper airway secretions
- Pulmonary edema and acute respiratory distress syndrome
- Death pronouncement
- Death certificate
- Organ and cornea donation

Chapter 29: Palliative Sedation for Refractory Symptoms at the End of Life

- Definition and principles
- Incidence of palliative sedation
- Indications for palliative sedation
- Ethical considerations
- Prior to initiating palliative sedation treatment
- During maintenance of palliative sedation treatment
- Monitoring during palliative sedation
- Pharmacological agents

Chapter 30: Miscellaneous

- Cancer treatments: an overview
- Subcutaneous medications in palliative care
- Establishing brain death
- Withdrawing respirator support

Appendix: Clinical Screening, Assessment, and Monitoring Instruments

- Edmonton Symptom Assessment System–Revised Version (ESAS-r)
- Blessed or Short Orientation-Memory-Concentration Test (BOMC)
- The Nursing Delirium Screening Scale (NuDESC)
- Other useful PROMS and instruments to screen for and assess patient needs
